LECTURES PROPOSALS

o Tuesday 15th October 2019 - 17.00 - Valentino Castle – Sala della Caccia
  Prof. Snezana Vesnic
  University of Belgrade - Faculty of Architecture

Proposal n.1 - Genius loci in Serbian contemporary architecture
The lecture deals with the topic of genius loci, which means understanding the link between the territory (landscape, area, site) the project and the architecture. The genius loci may suggest several decisions inside the journey of design, from the drawing of the first shape of the building to the choosing of the right material for the surface of it. The lecture could take into consideration both the projects arch. Vesnic outlined in the past years and Studio's works supervised with students. In this way the main topic aims to give a general overview of a different idea of genius loci in work and teaching.

o Wednesday 16th October 2019 - 17.30 - Valentino Castle – Room 10V
  Prof. Snezana Vesnic (main speaker)
  University of Belgrade - Faculty of Architecture

Presentation and Introduction

The Memorial today. Keep the memory through a new design.
prof. Emanuele Morezzi 20 min

Conflict memories. Project of the new Memorial for the NATO bombing of Belgrade, Serbia.
prof. Snezana Vesnic 60-80 min

The lecture aims to describe the process carried out by the architect to complete the design of the Memorial related to the bombing attack of Belgrade of 1999. The seminar will be focused on the history of the bombing attack, the debate which followed, the competition established by the municipality and the final project. In this point of view, the lecture will explain also the social and general attitude of the Serbian people in accepting the new design and the conservation of the memories of the past. The communication will mainly focus on the Memorial project of Belgrade and the process of its design.
